

## BYO DELUXE SINGLE ASSEMBLY INSTRUCTIONS

Call 800.648.6058 or Visit our Website at  
WineEnthusiast.com  
333 North Bedford Rd, Mount Kisco, NY 10549

**Please review all assembly instructions before building your cellar.**

- This unit is not meant to be built-in or recessed into cabinetry. Provide 5" clearance for back, top and both sides of the unit.
- This unit is not meant to be located outdoors or in areas of high humidity
- Place unit in a clean area so that you can periodically vacuum the condenser coil.
- Always remove all bottles before moving your BYO.

### Part and Hardware List

Part no.	Name	Quantity	Part no.	Parts Included In Hardware Box	Quantity
A	Top Panel	1 pc	I	Short Philip Head Bolt ( for cooling unit	2 pcs

C1	Side Panel (right)	1 pc	L	Extra Long Hex Bolt	30 pcs
D	Back Panel	1 pc	M	Bolt Cap	24 pcs
E	Door	1 pc	N	Ellen Key	1 pc
E1	Lock Metal of Door Lock	1 set	O	TWE tab for door	1 pc
F	Wooden Shelves	12 pcs	P	Sealant	2 pcs
G	Base stand and Adjustable Feet	2 sets	Q	Insulating Foam	1 pc
H	Screw ( for G)	6 pcs	R	LED Light	1 pc

When laying out BYO parts, Place pieces on a soft surface to prevent scratching.

**IMPORTANT:** Letter code labels on A, B, C, C1 and D mark the EXTERIOR side of panel.

1) Start by laying out all pieces to make sure you received all the parts you will need to assemble your BYO 150. As a general rule of thumb apply silicone to any and all joints.

**IMPORTANT:**  
Letter code labels on A, B,  
C, C1 and D mark the  
EXTERIOR side of panel.

### ASSEMBLY INSTRUCTIONS

- 1) Once you confirm you have all the hardware and parts to assemble your unit, start by attaching part A & B (top and bottom panel with the black paper side facing the inside of the cabinet and the metal lip facing away from part D. this metal lip will line up with the door gasket to seal the door.) to part D (back panel with hole cut out for cooling unit, make sure the black paper side faces in.) use screw O to attach these parts.
- 2) Attach parts C and C1 (side panels, be sure to have the shelving supports with the holes facing up towards part A with the black side facing in, metal lip should face out towards the door) to part D using screw L, apply silicone at the joints.

**STEP 2**

**STEP 3**

- 4) Place cabinet on its back and lay door on top of the unit. At this time the door gasket on the inside of the door should line up with the metal lip all around the edges of the unit. attach part J (door hinge) to the bottom using screw K. repeat process on the top hinge (part J) using screw K.

**Bottom Hinge**

Install bottom hinge first. Install cellar door while cabinet is on it's back.

**Top Hinge**

- 5) Install legs (part G) using screws (part H). Then tighten all bolts and stand cabinet upright.

Check that doors seals fit to body Panel and doors are turning smoothly. Adjust hinges accordingly, if necessary.

- 6) Starting from the bottom insert the shelf (part F) into the cabinet and drop on to the wooden dowel to anchor it in its place.

## BYO Shelf Loading Tips

- Each wooden shelf can hold 12 standard Bordeaux bottles, neck to neck. If you load the shelves with oversized bottles, you will reduce overall bottle capacity
- Maximum load- 120 pounds per shelf
- Maximum Capacity- 156 Bordeaux bottles. (Removing bottom shelf). 10 shelves-120 bottles plus 36 bottles stacked 3 rows high on floor of cabinet.
- See Figure A for diagram to show proper way to load shelves.

**Figure A- CORRECT WAY TO LOAD SHELVES**

- See figure B for the **incorrect** way to load bottles on the wooden shelf. Never have all of the weight of the bottles only on the front or only on the back of the shelves as this may cause the shelves to tip forward or backwards.

**Figure B- INCORRECT WAY TO LOAD SHELVES**

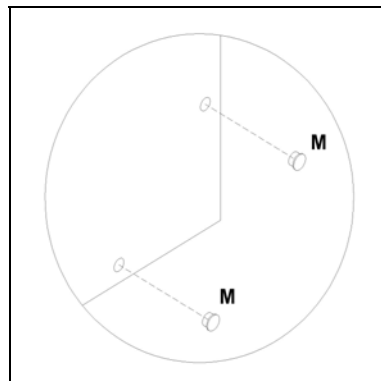

- Never stack bottles more than two rows high on a shelf. All shelves must be installed as directed.
- If you wish to keep your shelves permanently in place, affix the dowels to the shelf guides and shelves to the dowels by using a permanent wood glue.
- Avoid placing bottles directly in front of the cooling unit's fan to ensure a more uniform temperature in the BYO
- You can also load 13 standard Bordeaux bottles on the floor of the BYO, neck to neck. If you chose to remove the bottom shelf you can stack bottles three rows high which will allow more overall bottle capacity of the unit.

- 7) Attach the cooling unit (kw800) to the ceiling using part I which will be pre attached in part A. Please refer to cooling unit manual for proper usage. Take insulating foam (part Q) and fit in the space between the cooling unit and outer edge of the back panel to ensure a tight fit.

- 8) Insert Bolt Caps (Part M)
- 9) Assemble lock by inserting the cylinder in to the pre-drilled hole in the door. Attach by using the locking nut and make sure to line up the latch with the lock.

#### STEP 8

#### STEP 9

- 10) Stick LED light (part R) to interior side panel of unit after inserting the batteries.

**Please speak to your Retailer before calling Wine Enthusiast if you did not purchase your Wine Cellar directly from Wine Enthusiast.**
