

Monthly Operating Cost

Le Cache Wine Cabinets / CellarPro 1800 Wine Cooling Units

Kwh Rate (1)	\$0.05	\$0.10	\$0.15	\$0.20
Average Compressor Run Time (2)				
30 Minutes / Hour	\$5.13	\$10.26	\$15.39	\$20.52
40 Minutes / Hour	\$6.66	\$13.32	\$19.98	\$26.64
50 Minutes / Hour	\$8.19	\$16.38	\$24.57	\$32.76

Notes:

(1) Your Kwh rate can be found on the electric bill that you receive from your electric utility provider.

(2) Estimated run time in a given hour over a 24-hour period. The amount of run time will depend on a number of factors, including the temperature set point, the temperature in the ambient environment outside the wine cellar, ample ventilation and proper maintenance of the wine cooling unit.

Assumptions:

- CellarPro's 1800 Series wine cooling units use approximately 270 watts when the compressor is "on", and 15 watts when the compressor is "off".
- We have not accounted for power consumed from a light or other items that are plugged into the electric outlet on the side of the cooling unit.
- We assume 30 days in a month.
