## Standard Features

- Pro-Line™ Back Bar units are front breathing.
- Refrigeration system is a free flowing air system with a side mounted evaporator ensuring ice cold products.
- With innovative and eco-friendly technology, Micro Matic utilizes R-290 Hydrocarbon designed to meet DOE's Energy Conservation standards with very low contribution to global warming (ODP-0) (GWP-3).
- Heavy duty 18 gauge stainless steel top, durable stainless steel inside walls and covered corner floor. Reinforced bottom door frame to protect your long term investment.
- Greater usable capacity with the ability for 3 tall boys high and ability to load product the full depth of the box.
- Units come with compressor mounted on the left side with service friendly slide out rail system.
- LED light mounted under the mullion to protect itself from everyday operations.
- Pro-Line™ Back units have been designed to meet ADA requirements – fits fully tapped kegs.

# Specifications

## Construction

Heavy duty stainless steel top, 18 gauge. Black vinyl front, sides and back. (S) Models have stainless steel front and sides. Galvanized back panel. Interior constructed of heavy duty stainless steel walls with covered corner NSF approved stainless steel floor. Door is comprised of heavy duty black vinyl steel. All models are provided with a lock per door, magnetic door gaskets which are removable without tools. Door openings have a plastic breaker strip which slows the formation of condensation. Each model is manufactured with 2" of Ecomate CFC-Free polyurethane insulation which is foamed in place.

## Refrigeration System

Self-contained capillary tube system using environmentally friendly (CFC Free) R-290 refrigerant. Front breathing compressor on left side for built-in applications. Evaporator coil is mounted to interior left side above the compressor. Large fan motor and fan blades for greater air flow. Automatic condensate evaporator, no drain connection required. Evaporator condensate has been plumbed to a condensate pan located in the compressor housing. Access for the condensing unit behind the front grill, slides out for easy cleaning and maintenance. Cabinets are designed to maintain internal cabinet temperatures between 33° F to 38° F.

## Lights

Interior LED light underneath the mullion

## Plumbing

Automatic condensate evaporator, no drain connection required. Evaporator condensate has been plumbed to a condensate pan located in the compressor housing.

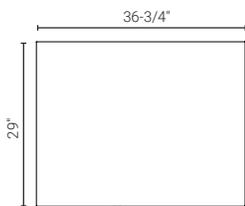

## Others

Unit is supplied standard with an 8' cord and plug (NEMA 5-15p).

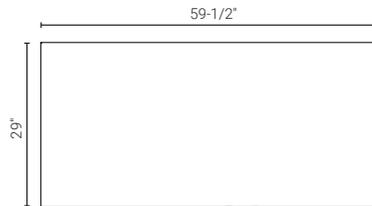

## Warranty

3 year parts and labor plus 2 additional years on compressor (parts only).
