

NITROBEV 360

All-in-One Nitrogen Generator System

Cold-brew coffee, craft cocktails, juice, tea, beer and beyond...

Creative operations are exploring all new ways to elevate flavor, mouthfeel, aroma and presentation with nitrogenation — while scoring all the business benefits that come with it.

And everything you need to nitro is here.

NitroBev 360 utilizes advanced membrane technology to deliver gas on demand from thin air in a single, turn-key system.

NEW TO NITROGEN?

Go from zero to nitro in seconds with one easy, affordable system.

ALREADY TAPPING?

Put an end to empty-tank anxiety, downtime and expensive deliveries.

NitroBev 360 can accompany direct draw keg systems or be installed remotely for a high-quality performance at a easy-entry price.

Sleek, compact design | Quiet operation | Low operating cost | No accessories needed

MODELS: **N2B360-C** – Nitrogen only for cold brew nitro-coffee applications
N2B360-BC – Blends Nitrogen with CO2 for draft beer applications

Product delivery	N2B360-C - 99.7-99.8% Pure Nitrogen N2B360-BC - 25% CO2 + 75% Nitrogen(99.7-99.8% purity)
Volume	1.8 cu ft/hour
Dimensions	(L)18" X(H)18" X(W)8"
Weight	52 lbs.
CO2 Requirements (<i>applicable models</i>)	100 PSI Inlet pressure
Electrical requirements	115V 10AMP 60Hz

JUST PLUG IN AND DISPENSE
